

Thread: Phase 4 ViewMan

Prepared by Phase 4 ViewMan — LibraryEntry_Phase4ViewMan · 2026-06-20 · SHADS CW channel

Project: MTGManuscriptv0Clean (*supplied-by-Paul*) **Started:** 2026-06-03, 15:22:32 BST (14:22:32 UTC) (*verified from chat export*) **Last active:** 2026-06-13, 18:51:55 BST (*verified from chat export*) **Turns:** 25 from each side (50 messages total) **Assistant name/role:** Claude. **No instance name assigned at Phase 3 outset (inbound passon explicitly forbade adopting one).** **Chat title** Phase 4 ViewMan suggests a Phase 4 visual-review role; not yet formally adopted.

Scope

Executed Phase 3 of the *Mind the Gap* (V83 → V84) proofread workflow: producing tracked-change Word edits for 17 locked decisions plus the visual-sweep mechanical findings catalogued in the integration report. Three batches delivered. Phase 3 closed with V84 (57,333 words) verified clean. Subsequent thread conversation covered Phase 4 scoping and the agreed sequence with Claude Code's parallel typesetting work.

Inputs (received)

- MindTheGap_Phase3_Passon.md — 2026-06-03 14:22 UTC — inbound passon defining Phase 3 scope, 17 locked decisions, visual-sweep items
- MindTheGap_FinalManuscript_0.docx — 2026-06-03 14:23 UTC — V83 manuscript, 57,412 words, the input to Phase 3
- 1780496905388_MindTheGap_IntegrationReport.md — 2026-06-03 14:28 UTC — 22 findings, RAG × GSB tiered
- MindTheGap_V84.docx — 2026-06-13 15:13 UTC — post-acceptance clean state, 57,333 words

Artefacts produced (in /mnt/user-data/outputs/)

- MindTheGap_V83_TrackedChanges_Phase3_Batch1.docx — 2026-06-03 14:41 UTC — 12 tracked edits in front matter / copyright / acknowledgments; Ch 4 canonical line tightened; bibliography canonical-line parentheticals stripped; colophon word count rewritten.
- MindTheGap_V83_TrackedChanges_Phase3_Batch2.docx — 2026-06-03 14:52 UTC — mechanical batch: Decision 1 (father age), Decision 12 (Plugs timeline), §17 line 713, §19 unit/case fixes, New H terminal punctuation, New M Ewan blurb. Plus §4 (Ch 8 → Heading 1) and New A (image alt-text) as direct format edits.
- MindTheGap_V83_TrackedChanges_Phase3_Batch3_FINAL.docx — 2026-06-03 15:00 UTC — substantive rewrites: Decision 14 (Layers Map + Additional Intelligence entries removed), Decision 2 (About the Author + Ch 8 list rephrasings), Decision 13 (NCPS → NCS line), New B (closing italic block), New I (*Nothing italicised*).
- MindTheGap_Phase3_ArtefactIndex.md — 2026-06-13 — earlier full audit index (verbose; superseded by this entry as the library-format summary).
- LibraryEntry_Phase4ViewMan.md — 2026-06-13 — this file.
- LibraryEntryPrompt.md — 2026-06-13 — reusable prompt for generating library entries in other threads.

Handover

- **Inbound: Yes — Phase 3 Passon, processed via passon-discipline (orientation report at thread start).**

- **Outbound: No formal passon. Phase 3 was scoped as one-session execution; output is V84 docx for Paul's onward work with Claude Code (typesetting).**
- **Continuity: Parked. Awaiting stable handover from Paul (post-CC typesetting + Paul's editorial pass) to do Phase 4 visual sweep on the near-final document.**

Verification status

Filesystem paths, sizes, timestamps for artefacts and uploads verified via `ls -la` and `stat`. Project name and chat title supplied-by-Paul via UI breadcrumb screenshot (2026-06-13). Thread start/end timestamps and turn count verified from chat-text export supplied by Paul on 2026-06-13. None of: project name, chat title, message timestamps, or chat title are exposed to the assistant inside the Claude runtime — confirmed by running `recent_chats`, which returned other chats in the project but not the current chat or any project-name string. Assistant model version not exposed to runtime; left as unknown.
