

MTG Change Log — V77 → Rev 2 v0.0

Prepared by Jose 5 — MTG-Change-Log-V77-Rev2 · 2026-06-20 · SHADS CW channel

Session: 29 May 2026. Jose / Paul Roebuck. Source of truth for the V77 cycle and the Rev 2 v0.0 promotion. Continues the V70→V76 log.

Headline

The Vnn working counter retires at V77. The manuscript is promoted to **Rev 2 v0.0 — editorially complete, ready for external review. One tracked editing pass (three edits), then Paul's hand-back with amendments and a small cut.**

Revision scheme (new):

- Rev = an external-facing milestone build. Rev 1 was the ~27,000-word initial-review manuscript. Rev 2 is the complete ~46,130-word book.
 - vN.M = review iteration within a Rev. v0.0 is the pre-review baseline; reviewer feedback iterates v0.1, v0.2...; folding it in cuts the next milestone.
 - The internal Vnn counter (...V76 → V77) is retired and recorded here for audit. Rev 2 v0.0 ≡ V77 + Paul's hand-back.
-

V77 — date fix, heading rename, front-page block

Single tracked-editing pass on the V76 baseline. Three edits.

- Edit 1 — Ch 4 date. "the ChatGPT I first logged into in November 2022" → "...in December 2022." Clears the contradiction with Ch 9 and Ch 10 (both 11 December 2022) and with the 30 November public launch.
 - Edit 2 — Ch 10 heading. The duplicated body heading "The Maturity Spectrum" (the one after the 11-December vignette) → "The Four Postures." Honours the chapter's reframe (*they are not ranks, they are postures*) and stops the chapter title appearing twice within sixteen lines. Chapter title and Contents entry unchanged.
 - Edit 3 — Front-page "Who is this book for?" block. Rewritten to Paul's specification: dropped "serious"; folded the prompting/vibe-coding boundary into a positive frame; regrouped into three reader-sections; left-aligned (was centred); close retained. Spelling/grammar fixes: *resposnilbe* → *responsible*; broken "...analysis. and executives..." join repaired; stray double space removed; *mental-health providers* → *provider*.
 - Mode: tracked editing (one structural element — the block rewrite — handled within the same tracked pass).
 - Verification: accept-all simulated and diffed against V76. Only the three intended changes present; nothing else moved.
-

Rev 2 v0.0 — Paul's hand-back

Paul accepted the V77 changes on the Mac, with amendments, and the file returned **clean (zero tracked changes)** — correct for an external-review build.

Changes observed on Paul's side (his edits, recorded not corrected):

- **Front-page block:** re-split to one audience per line; wording tuned — added *bankers*; *sales leaders* → *leaders*; *has to bear* → *must bear*; *Plus* → *Plus,*; *close now* reads *"This is not a book about AI, or how to use AI. It is a book about behaviour."*
- **Ch 14:** removed *"Mr [name held]'s fingers."* from the *what the human brought list*. *[name held]* now appears nowhere in the manuscript body; still acknowledged in the front matter, which stands alone cleanly — no orphan.

State at promotion:

- ≈46,130 words (clean; count varies slightly by method). 15 chapters. UK English en-GB.
- No residual tracked changes. No orphan deletion marks.
- Editorially complete by Paul's judgement and Jose's, as editor.

Companion documents brought into line (this session)

Document	From	To	Nature of change
Canonical Lines Register	v1.4 (mounted)	v1.5	+CL-35/36/37 (Bill Ollis lines, verbatim); Rev 2 baseline note. No canonical change in the Rev 2 cycle itself.
To-Do Tracker	v3 (V69)	Rev 2	Closed V70–V76 items (Stanford verify, Two Dads, title page, ISBN swap-in); reframed remaining work as the production / post-review track.
Helicopter View	v69	Rev 2	Ch 10 naming (Four Postures); Ch 14 Two Dads row rebuilt (Bill Ollis, father at five, reframe); baseline updated.
Artefact List	28 May (V69)	Rev 2	Refreshed to the Rev 2 baseline and this session's artefacts.
Breadcrumbs	V36 (mounted, stale)	Supplement V70→Rev 2	New decisions supplement; master log not held — see open items.

Open items at session close

■ **Cover-file ISBN swap** — real Nielsen 978-1-0369-9170-8 is in the manuscript copyright page; confirm the cover artefact carries the print-ready barcode (mock 978-1-915678-15-2 removed) before KDP.

■ **Who-is-this-book-for block** — review-copy only; must be removed before KDP upload. Present in Rev 2 v0.0 by design.

■ **Ebook ISBN** — second Nielsen order pending; holds the copyright-page ebook edit.

■ HTML artefact (Option C) — committed, not started. Carries the four extras, the June 2014 *Whole Self paper*, the *journal artefact*, and the *working-method documents*.

■ Open canonical questions carried from V69 assessment — CL-8 (lost in restructure), CL-2 (not found verbatim), CL-13 (wording drift). Not resolved this cycle; the register flags them. Paul's call whether to action before or after review.

■ Margin Notes / master Breadcrumbs — current versions not in hand this session; needed for a full reconcile (see Jose's note to Paul).

■ The book is editorially complete. Remaining path is production: cover-file ISBN, ebook ISBN, front/back-matter placement, HTML artefact, layout, fonts, KDP upload — plus external-review feedback when it lands.

Maintained by Paul Roebuck, in collaboration with Claude (Jose). End of V77 / Rev 2 v0.0 cycle.

V79 — factcheck branch (light summary, reverse-engineered from diff)

*Added 01 June 2026. Paul made these in a separate branch (combination of manual and other edits) and supplied V79 as the current, most up-to-date version. It supersedes this session's Rev 2 v0.0. Summary below is derived by diffing Rev 2 v0.0 → V79; the **what is verified against the files**, the **why is inferred from the factcheck thread and labelled where uncertain**.*

V79 is the live baseline. ≈46,236 words. Carries all V77 work (December date, "The Four Postures", [name held] cut) plus the factcheck pass below.

- Ch (anchors) — Frankl line softened. "Frankl: between stimulus and response there is a space" → "Frankl: the principle most associated with him — that between stimulus and response there is a space"; Buddha line likewise hedged ("often rendered from the Dhammapada"). *Resolves the known Frankl misattribution — the quote is widely attributed to Frankl but not found verbatim in his work. Framing now claims association, not authorship.*
- Ch 13 (WaaS) — fabricated statistics replaced with sourced figures. The old "99.6% accuracy / 68% cycle time / 57% cost" block → Gartner (by 2029, agentic AI resolves up to ~80% of common service issues, ~30% cost cut) and Klarna (OpenAI assistant, early 2024: two-thirds of chats within a month, ~700 FTE-equivalent, resolution 11 min → under 2 min). *Primary-sourced; matches the factcheck thread.*
- Ch (data-centre passage) — environmental figures hedged. Google water "six and a half billion" → "around six billion gallons"; the ChatGPT-vs-search energy claim now flagged as a 2024 estimate "since revised sharply downward." *De-risks contestable figures.*
- Ch (inner-child / paralaminar) — age corrected. "77-year-old brain" → "78-year-old brain." *Aligns with the Nature Communications 2019 source.*
- Front matter — subtitle reflowed to two lines on the title page; minor block punctuation settled (bold artefacts gone).
- ■ Credentials line now reads "NCS (Accred)" — the "M" has been dropped from "MNCS". See flag below.

Companion docs (Register v1.5, To-Do Rev2, Helicopter Rev2, Artefact List, Breadcrumbs supplement): no canonical-line change in V79; the WaaS/Gartner/Klarna and Frankl items were already noted in memory. Bibliography should gain Gartner + Klarna entries if not already present.
