

Passon — Reviewer to Bob — Pass 1 ratified items — v1

Prepared by the-reviewer — Passon_Reviewer_to_Bob_Pass1_v1_2026-06-01_1730 · 2026-06-20 · SHADS CW channel

Passon — Reviewer → Bob — Pass 1 ratified items

From: The Reviewer (seventh shore position) **To:** Bob the Builder **Via:** Paul (ratified 2026-06-01 ~17:25 UTC) **Build under audit:** The_Vault_v0.47_banner_swap_2026-06-01_1626.html **Target build:** The_Vault_v0.48_pass1_fixes_2026-06-01_[HHMM].html

Seven items raised in Pass 1. **Two are yours to implement now. One is held pending the Curator. Two go to other shores (Curator, Fisherman). Two are deferred to Pass 3.**

ITEMS FOR YOU TO IMPLEMENT IN v0.48

B1 — Ticker headline → CL-A-003 v4 verbatim

Current (broken English — verb missing):

THIS ARTEFACT IS WITH WORDS WHAT BANKS DO WITH NUMBERS.

Replace with the locked CL-A-003 v4 form:

THE INSTRUMENT DOES WITH WORDS WHAT BANKERS DO WITH SPREADSHEETS.

Keep the existing ticker-positioning styling — all caps, bold, gold accent separators on either side. Two-channel ticker structure unchanged. Source of truth:

Canonical_Lines_Master_List_for_Bob_v1_2026-06-01_1130.md § B item 16. Single replacement, line ~1475 of v0.47 source.

B2 — Cabinet → render all 26 artefact canonical lines

Current: Cabinet renders 8 artefact canonical lines, with a footnote naming the other 18 as "not surfaced in the Cabinet at Stage One ship."

Ratified instruction (Paul, 1 June 2026): *"we can accept them all - dont leave any not included."* **Cabinet expands to all 26 ratified artefact lines.**

What to do:

1. **Source the 26 lines verbatim from**

Canonical_Lines_Master_List_for_Bob_v1_2026-06-01_1130.md § B (items 1 through 26). Voice preservation absolute — *xlaiminf, didnt, no apostrophes where absent in source, 15 nov 2006 lowercase, all typos held.*

1. **Render in the same matrix format as the current eight (ds-table cl-table cl-artefact). Same three-column layout: cl-num · cl-line-cell · cl-meta. Same styling.**

1. **All 26 carry the LOCKED badge (green) except CL-A-003 v3 which carries the SUPERSEDED badge (warm grey) per master list § B item 14: "Both forms retained in the Cabinet — Bob shows v3 with 'SUPERSEDED 2026-05-30' badge and v4 as LOCKED." CL-A-003 v4 (item 16) carries LOCKED.**

1. **Order — chronological per the master list, starting with CL-A-005 (its 2006 original date placing it first), through CL-A-004 (item 26). Master list § B already lists them in the order Bob should render.**

1. Drop the current footnote (ds-footnote paragraph): *"Honest perimeter — the further artefact canonical lines... live in the working register and the Documents door trail. Not surfaced in the Cabinet at Stage One ship."* No replacement footnote needed; all lines now surfaced.

1. Headline panel intro update — current: *"Locked verbatim — 8 book lines · 8 artefact lines."*
Change to: *"Locked verbatim — 8 book lines · 26 artefact lines."*

B3 — Book Canonical Lines table, row 3 — pending Curator

Current:

didnt understand anything yet. I just recognised there was something to understand.

Observation: The Master List Section A.1 item 3 omits the leading *"I"*; the artefact-side CL-A-005 row in the same Cabinet carries the *"I didnt understand..."* form. Same source line, two renderings, one short.

Hold: Do NOT change the book-side row yet. Curator confirms which form is verbatim. Paul will surface to Curator; Curator returns; Bob then adjusts to whichever form is canonical. The two cabinet entries should match the Curator's verdict.

ITEMS NOT FOR BOB — held with other shores

Curator's in-tray (via Paul)

- C1 — Book Canonical Lines row 3 verbatim. Leading *"I"* or no leading *"I"*? Master list and artefact-side CL-A-005 currently disagree. Curator's call settles which form is canonical; Bob then aligns both cabinet entries to match.
- C2 — CL-A-019 case. Defended Gap discipline-anchor renders *"speaking to my AI as I would a hugely valued human - indistinguishably so."* — lowercase s. Master list § B item 18 shows *"Speaking..."* — capital S. Curator's call settles which form is canonical.

Fisherman's in-tray (via Paul)

- F1 — "The Context" rename. The panel formerly named *Honest Perimeter* now renders as *The Context*. Risk: visitors read *"Context"* as background and don't open the panel; the *Honest Perimeter* is the room's honesty and depends on being visible. Proposal: surface *honest-perimeter* intent in either the label or the panel intro, or restore *Honest Perimeter* with a one-line gloss for the mum end. Fisherman's editorial call.

Pass 3 deferred (the Reviewer holds)

- R1 — Threshold cognitive load. Five small visible-from-threshold panels stay as five (Paul ratified). Labels and intros sharpened in Pass 3 — every textual element triaged against Paul's register.
- R2 — Every label · caption · button · panel intro · drawer name · card subtitle. Pass 3 territory. Bob holds current copy until Pass 3 findings land.

DEPENDENCIES

- B1, B2 — Bob ships in v0.48 immediately.
- B3 — Bob holds for Curator return.
- F1 — Bob holds for Fisherman return.
- Pass 2 (mobile + accessibility) opens on Paul's nod. Findings filed separately.

- Pass 3 (voice and copy) follows Pass 2. Findings filed separately.
 - Session 4 (optional) — Reviewer files a consolidated handover after all three passes ship.
-

METHOD DISCIPLINE NOTES (for Bob's session journal)

- **Propose-don't-impose preserved.** Two items ratified by Paul (B1, B2). One held for cross-shore confirmation (B3). Bob does not silently rewrite.
 - **Voice preservation absolute.** All 26 artefact lines verbatim from master list. No smoothing. No apostrophe inserts. No date-form normalisation. *xlaiminf, didnt, 15 nov 2006* — *held as written*.
 - **Provenance discipline.** Each rendered card carries author + date + status badge per existing pattern. Master list § B has the provenance per item.
 - **Filing convention.** New build at `The_Vault_v0.48_pass1_fixes_2026-06-01_[HHMM].html`. Session journal at the existing convention (`Journal_011_*` or equivalent — Bob's choice of label).
